February 2011

LEAP for Success!!

The University of North Texas Department of Library and Information Sciences and PREL, are starting a new cohort in September in the U.S.-affiliated Pacific islands.

The 10-day institute is scheduled for August at the College of Micronesia national campus in Pohnpei, Federated States of

Micronesia.

They are collaborating in order to **offer full tuition scholarships for Pacific islanders living and working in the U.S.-affiliated Pacific islands.**

Funded by the Institute of Museum and Library Services, the scholarships will serve to recruit and educate librarians to work in the

islands and increase the number of indigenous librarians among the region's professional library staff. To learn more, visit www.lis.unt.edu/LEAP.

Campus News

PIU Days are here!

March 11 marks the start of the annual PIU Days festivities. Check the roster for your group name and captain. This weekend event

combines fun, fellowship, and devotions to provide an active participation in God's kingdom. Even if you aren't a sports participant, you can come and cheer on your team!

Hot on the heels of PIU days, all participants can nurse sore muscles and spend time in quiet contemplation during the week long break which offers respite from studies for students and teachers.

PIU Library Collection

“It is impossible for those who have once been enlightened, who have tasted the heavenly gift, who have shared in the Holy Spirit, who have tasted the goodness of the word of God and the powers of the coming age, if they fall away, to be brought back to repentance, because to their loss they are crucifying the Son of God all over again and subjecting him to public disgrace.”

Hebrews 6:4-6

***Music, the Brain, and Ecstasy: how Music Captures our Imagination* by Robert Jourdain**

From the primitive imagery represented in the introduction, Jourdain takes the reader through the magical world of

musical sound. Combining science, art, sociology, and more music is explored to its fullest extent; how it is integrated quickly within children’s minds, natural occurrences, and the complexity of thought demonstrated in the combinations of

8 simple notes. This fascinating look at an invisible world often taken for granted will give you a new appreciation for music in its entirety.

Seminary Titles

***The Genesis of Doctrine: A Study in the Foundation of Doctrinal Criticism* by Alister E. McGrath**

In a society that values change and embraces

superficial belief, is there a future in dogma and doctrine within the Christian church? McGrath addresses this and many other aspects of the church as it relates to the historical church. He also engages the work of

George Lindbeck in a critical way before addressing the nature and function of Christian doctrine. This book provides a good foundation in discovering ecumenical doctrinal differences.

Family Collection

***Fame* by Karen Kingsbury (The Baxter Family Drama #1)**

Fame is the first book in the “Baxter Family Drama” Firstborn series.

Karen Kingsbury, the best-selling author, has created a series that will shock, bereave, uplift,

and console you. Beginning with the “first born” and the already decadent and sin-riddled setting of Hollywood, Kingsbury’s characters come to life as they learn

to seek God as they wound and heal each other.

Other titles in the series:

Forgiven *Found*
Family *Forever*
